

WorkMithra - Complete Database Design

The WorkMithra database architecture is designed to manage users, workers, services, bookings, payments, authentication, notifications, ratings, availability tracking, and future scalability features.

1. USERS TABLE

Column Name	Data Type	Description
id	UUID / INT	Unique user ID
full_name	VARCHAR	User full name
phone	VARCHAR	Mobile number
email	VARCHAR	Email address
profile_image	TEXT	Profile image URL
role	VARCHAR	user / worker
gender	VARCHAR	Gender
address	TEXT	User address
city	VARCHAR	City
state	VARCHAR	State
pincode	VARCHAR	Postal code
latitude	DOUBLE	GPS latitude
longitude	DOUBLE	GPS longitude
created_at	TIMESTAMP	Account creation time
updated_at	TIMESTAMP	Last update
is_verified	BOOLEAN	OTP verification status
is_active	BOOLEAN	Account active status

2. WORKERS TABLE

Column Name	Data Type	Description
worker_id	UUID / INT	Unique worker ID
user_id	FK	Linked user account
full_name	VARCHAR	Worker name
phone	VARCHAR	Mobile number
skill	VARCHAR	Main skill
experience_years	INT	Experience
bio	TEXT	Worker description
hourly_rate	DECIMAL	Service cost
availability	BOOLEAN	Available or not
current_status	VARCHAR	online / busy / offline
profile_image	TEXT	Worker image

rating	FLOAT	Average rating
total_jobs	INT	Total completed jobs
completed_jobs	INT	Successfully completed jobs
cancelled_jobs	INT	Cancelled jobs
city	VARCHAR	Worker city
location	TEXT	Full address
latitude	DOUBLE	GPS latitude
longitude	DOUBLE	GPS longitude
aadhaar_verified	BOOLEAN	Identity verification
created_at	TIMESTAMP	Registration time

3. SERVICES TABLE

Column Name	Data Type	Description
service_id	UUID / INT	Unique service ID
service_name	VARCHAR	Plumbing, Electrical
description	TEXT	Service details
icon	TEXT	Service icon/image
base_price	DECIMAL	Starting price
created_at	TIMESTAMP	Creation time

4. WORKER_SERVICES TABLE

Column Name	Data Type	Description
id	UUID / INT	Unique ID
worker_id	FK	Worker reference
service_id	FK	Service reference
experience_level	VARCHAR	Beginner/Expert
service_price	DECIMAL	Worker-specific price

5. BOOKINGS TABLE

Column Name	Data Type	Description
booking_id	UUID / INT	Booking ID
user_id	FK	Customer ID
worker_id	FK	Worker ID
service_id	FK	Service booked
booking_date	DATE	Booking date
booking_time	TIME	Booking time

status	VARCHAR	pending/accepted/completed/cancelled
problem_description	TEXT	Customer issue
estimated_price	DECIMAL	Estimated cost
final_price	DECIMAL	Final cost
customer_address	TEXT	Service address
latitude	DOUBLE	GPS latitude
longitude	DOUBLE	GPS longitude
created_at	TIMESTAMP	Booking creation

6. PAYMENTS TABLE

Column Name	Data Type	Description
payment_id	UUID / INT	Payment ID
booking_id	FK	Related booking
user_id	FK	Customer ID
worker_id	FK	Worker ID
amount	DECIMAL	Payment amount
payment_method	VARCHAR	UPI/Card/Cash
payment_status	VARCHAR	pending/success/failed
transaction_id	VARCHAR	Payment gateway ID
paid_at	TIMESTAMP	Payment time

7. RATINGS_REVIEWS TABLE

Column Name	Data Type	Description
review_id	UUID / INT	Review ID
booking_id	FK	Related booking
user_id	FK	Customer ID
worker_id	FK	Worker ID
rating	FLOAT	Rating value
review_text	TEXT	Customer feedback
created_at	TIMESTAMP	Review time

8. NOTIFICATIONS TABLE

Column Name	Data Type	Description
notification_id	UUID / INT	Notification ID
user_id	FK	Receiver
title	VARCHAR	Notification title

message	TEXT	Notification body
type	VARCHAR	booking/payment/system
is_read	BOOLEAN	Read status
created_at	TIMESTAMP	Notification time

9. OTP_VERIFICATION TABLE

Column Name	Data Type	Description
otp_id	UUID / INT	OTP record ID
phone	VARCHAR	Mobile number
otp_code	VARCHAR	Generated OTP
expires_at	TIMESTAMP	Expiry time
verified	BOOLEAN	Verification status
created_at	TIMESTAMP	OTP generated time

10. CHAT_MESSAGES TABLE

Column Name	Data Type	Description
message_id	UUID / INT	Message ID
sender_id	FK	Sender
receiver_id	FK	Receiver
booking_id	FK	Related booking
message	TEXT	Chat message
sent_at	TIMESTAMP	Sent time

11. WORKER_AVAILABILITY TABLE

Column Name	Data Type	Description
availability_id	UUID / INT	ID
worker_id	FK	Worker
available_day	VARCHAR	Monday etc
start_time	TIME	Start time
end_time	TIME	End time
is_available	BOOLEAN	Availability

12. JOB_HISTORY TABLE

Column Name	Data Type	Description
-------------	-----------	-------------

history_id	UUID / INT	History ID
booking_id	FK	Booking
worker_id	FK	Worker
user_id	FK	User
completion_notes	TEXT	Work notes
completed_at	TIMESTAMP	Completion time

USER & WORKER DATA STORED

User Information Stored:

- Name
- Phone number
- Email
- Gender
- Address
- Booking history
- Payments
- Reviews
- Notifications

Worker Information Stored:

- Personal details
- Skills and experience
- Availability status
- Ratings and reviews
- Earnings history
- Verification details
